MASTER ARYEN SURESH KUTE

14 YEAR OLD
FOUNDER & CMD OF

OAO INDIA

MASTER ARYEN SURESH KUTE

Heads OAO INDIA as its Founder and CMD is one such young master.

The Young Master

India has had the good fortune to witness a sharp increase in the number of young entrepreneurs, which has supercharged the start-up ecosystem and generated employment. This shift has significantly impacted societal change and has raised workforce productivity. Some of India's top young business talents are under the age of 18, who have distinguished themselves by establishing goals and tenaciously pursuing them. That is no mean feat.

Entrepreneurship is a life-altering journey. Young entrepreneurs play an instrumental role in motivating and inspiring the coming generations as well as in accelerating the economic growth of any country. Moreover, in India, they are showing the world that

you don't need an Ivy League education to become a successful person. Will, creativity, determination, passion, and innovation are enough.

Master Aryen Suresh Kute heads OAO INDIA as its Founder and CMD. From an early age, he has been blessed with the insight and

vision of a true entrepreneur. At such a young age, he has achieved many enviable milestones. The young entrepreneur is also a recipient of many prestigious awards, honours, and recognition.

Making the leap

How did Master Aryen Kute make the leap from an ordinary schoolkid to an extraordinary young entrepreneur? Just like a typical pre-teen, Master Aryen Kute also loves playing games on his smartphone. However, it was his curiosity to know more about games that transformed him from an ordinary school student to an extraordinary young entrepreneur. While playing, the young and dynamic individual wondered how these games work. What is Game Development?

Burning with curiosity and a keen interest to learn new technologies related to games led him to the idea of starting a company in the field of the Gaming and IT sector. And that is how OAO INDIA saw the light of day.

Today, as a young entrepreneur, Master Aryen Kute is revolutionizing the gaming industry by leveraging his business acumen, innovative strategies, leadership skills, and, most importantly, his passion for games.

He also steered his team in the right direction, navigated them through unprecedented challenges, and maintained a constant influx of revenue while focusing on the company's success and growth. As a result, today OAO INDIA is counted among India's leading game development companies.

Master Aryen Suresh Kute has now become a role model for many young individuals, demonstrating how to balance school, extracurricular activities, and business success.

A rising star in gaming space

Master Aryen Kute founded OAO INDIA in 2018 with the sole mission of creating entertaining games that all age groups can play globally. He took a year thereafter, with the support and help from his parents, to build a robust infrastructure and assemble the most talented individuals from the gaming industry. In 2019, the company started making games, and has not looked back since. OAO INDIA Team has developed and released four games in different genres.

Its debut game, Krishna Makhani Masti (KMM), released in 2020 on the auspicious day of Janmashtami - is a Puzzle Bubble Shooting Game where the player has to help little Krishna by matching three or more coloured matkas to save his friends.

The second game developed is Indian Food Baash (IFB), a Match-3 Food Puzzle Game where one has to swap and match three or more food items to complete a level.

The third game, Rise of Warr, aka ROW, is a Strategic Card Game based on a fictional mythological war. The storyline makes the player the King of a small kingdom who was attacked by an evil king, and thus the player needs to defend their kingdom against the evil king and his minions.

WarZone: The Soldier is the fourth game. This Action-Packed Soldier Game is for individuals who love action or soldier-theme games. You play as Captain Roy, the elite soldier on a mission to shoot down enemies.

In addition, the company is set to launch their newest game, an endless runner game named School Time. The company has other big projects like multiplayer games in the pipeline. OAO INDIA's games can be found on multiple online app stores of prominent brands such as Samsung, Oppo, Vivo, Micromax, Google, and Apple.

The company also provides customized digital web solutions and expert digital marketing services.

Power to employees

As a young entrepreneur, Master Aryen Kute still has a lot of things to learn and comprehend. However, he perfectly understands the value of employee growth and believes that employee empowerment leads to higher job satisfaction, also improves work performance and creates greater commitment to the organization. So, the company has created an ecosystem where employees are free to learn, grow and share their experiences in order to build trust and understanding. Master Aryen Kute encourages his team to be more independent in the workplace.

A close-knit work culture

The parent organization, The Kute Group, follows a family-oriented culture. The same culture has been adopted at OAO INDIA, where

employees feel a sense belonging at the office. This allows employees to share their ideas and opinions, encourages mutual respect and understanding, and provides positive support. This is a tightly-knit team with a vision of putting OAO INDIA on the map as the best gaming company.

CSR Activities

Master Aryen Kute is also a philanthropist who believes in doing good and making people happy, which is reflected in his company's values and functioning. He is also constantly striving to make a difference by participating in charitable initiatives through Kute Group Foundation.

Through Kute Group Foundation, various charitable initiatives have been carried out. During the COVID-19 pandemic, food items and water were distributed to underprivileged families. Masks and sanitizers were given to employees.

Leading the way

Master Aryen Kute leadership style is 'Lead by Example'. He always guides his team and inspires them to do their best. For example, in the weekly/monthly meetings, the young entrepreneur has provided each employee with the chance to voice their ideas.

Master Aryen Kute celebrates their ideas and asks them to create a proposal to bring their ideas to life. Afterward, he praises person for their work efforts. He helps his team to achieve their maximum potential by giving his support and encouragement to team members whenever needed.
